

1000 KVA SOLAR SYSTEM NEW ZEALAND

How much does solar power cost in New Zealand? According to the Electricity Authority, the average size of a residential solar power system installed in New Zealand today is 4.4 kW, which would cost roughly \$12,600*fully installed. A 4.4 kW solar power system would include 10 or 11 solar panels (depending on the size of the panels) and a 4 kW or 5 kW inverter. Is Solar Power Worth It?

How much does a 3 kW solar power system cost? A solar investment is now achievable for many, not just a few. Back in 2008, a standard 3 kW solar power system cost around \$40,000. In 2024, the price tag of a 3 kW solar power system is approximately \$9,000*(completely installed). Due to supply chain issues and increased global demand for solar, prices increased in 2022 and 2023.

Are solar panels a good investment in New Zealand? A solar power system in New Zealand can easily earn a 10 to 15% return on investment. But this rate of return is likely to increase each year as the price of electricity continues to climb. Unsure if solar panels on your roof will be worthwhile or if the upfront cost will lead to a good payback?
