Here's how we calculate how many hours does it take for a 100-watt solar panel to charge a 50 Ah 12V battery: Charging time (50 Ah) = 600 Wh / 31.25 Wh per hour = 19.2 hours. It takes 19.2 hours to charge the 50 Ah 12V battery with 100-watt solar panels. Example 2: How long to charge a 120 Ah 12V battery with a 100-watt solar panel?

In your first post you stated "change the solar panels and connect to a new group of panels connected in series and parallel. The panels will deliver 36v". This suggests to me that you could either be removing the 18V panels and replacing them with an unknown number of 36V panels, or alternatively adding new 36V panels along side the original
