What is a 12V LFP battery? When the DC/DC power output is insufficient or faulty, the 12v LFP battery supplies power to the electrical equipment alone. 12v LFP battery can absorb transient overvoltage in the circuit, keep the voltage of automobile electrical system stable and protect the electronic components.

What happens if a 12V LFP battery is not in over-discharge protection state? When the 12v LFP battery is not in the over-discharge protection state, or when the ultra-low power consumption function is running, it will supply power to the electrical equipment. When the DC/DC power output is insufficient or faulty, the 12v LFP battery supplies power to the electrical equipment alone.
