

# ADJUSTMENTS TO POLAND'S SHARED ENERGY STORAGE POLICY

What are the new energy storage rules in Poland? Poland's new rules state that energy storage facilities over 10MW require licensing to ensure they can provide services to Poland's National Power System. Facilities 10MW or smaller do not need licensing but do need to register with the transmission system operator or distribution system operator for their area.

Which storage facilities will be supported by Poland's energy policy? The policy will support only newly installed storage facilities with a capacity of at least 4 MWh. Eligible projects will be connected to Poland's electricity distribution or transmission networks at all voltage levels.

What is Poland's energy storage subsidy program? Following a public consultation launched in July 2024, the Polish Ministry of Climate and Environment has finalized its energy storage subsidy program which aims to support the deployment of more than 5 GWh of energy storage in the country. The new regulation was published in the Journal of Laws of the Republic of Poland on March 7.

How will a storage facility be financed in Poland? Only storage facilities with at least 4 MWh capacity will qualify for the funding, which will be allocated through tenders managed by the Polish government. Projects selected for support will be connected to the national grid and play a key role in balancing supply and demand as renewable energy increasingly feeds into the system.

Will Poland support new electricity storage facilities in 2024? In an announcement released on October 3, 2024, the executive arm of the European Union said that the Polish scheme will support the installation of at least 5.4 GWh of new electricity storage facilities. The policy will support only newly installed storage facilities with a capacity of at least 4 MWh.

# ADJUSTMENTS TO POLAND'S SHARED ENERGY STORAGE POLICY

How will a new energy scheme affect Poland? The scheme will add at least 5.4 GWh of new capacity to Poland's electricity grid as the country adapts to the fluctuating outputs associated with renewable sources such as wind and solar. EU balances climate targets with minimising competition distortions

The 1.2 billion aid will facilitate the construction of these storage facilities, which are crucial for reducing the reliance of the Polish electricity system on fossil fuels. By

First, the operation mode of shared energy storage in multiple renewable energy bases is constructed to meet the adjustment needs of multi-agent. Secondly, considering the increasing

Shared energy storage is generally applied in the supply, network, and demand sides of power systems. The shared energy storage at the supply side is mainly utilized for

On 15 April 2021, the Polish Parliament in the Lower Chamber (Sejm) adopted a draft amendment to the Energy Law Act ("Draft"). The new provisions introduce comprehensive solutions for the

# ADJUSTMENTS TO POLAND'S SHARED ENERGY STORAGE POLICY

The energy storage projects we encounter on the Polish market are of great diversity, ranging from battery storage facilities with relatively small total installed capacities, through contracts focusing on the joint development ???

Implementing large-scale commercial development of energy storage in China will require significant effort from power grid enterprises to promote grid connection, dispatching, and trading mechanisms, and also ???
