

ALBANIA SOLAR ENERGY COMPANIES

What is the largest solar power plant in Albania? In late 2023 the 140MW Karavasta solar power plant was completed, having taken Voltalia of France 15 months to build, it is the largest in Albania to date. A 100 MW solar power project called Spitalla in Durrës area is planned to be built next. Albania has enormous potential for electric energy from wind power.

Is Albania a good place for solar energy? Albania gets about 2100-2700 hours of sunshine in a year so it has a great potential for solar energy. Solar energy is easily accessible since most energy comes directly or indirectly from the sun. It could be used for heating and lighting homes, commercial, and industrial buildings.

What is Voltalia doing in Albania? Voltalia has started doing business in Albania in 2018 with the unsuccessful participation in the first solar tender organized by the Ministry of Infrastructure and Energy of the Republic of Albania (MIE). Despite this result, Voltalia has demonstrated great interest in the construction of 2.5 MW FiT-solar PV projects.

Who is Vega Solar? Vega Solar is a German-Albanian renewable energy company focused on the photovoltaic sector. Our company has managed to leave a significant footprint in this sector due to the strategy focused on creating competitive advantages, as well as the way on enhancing partnership relations inside and outside Albania.

Can geothermal energy be used in Albania? Geothermal energy could also be used in Albania. It comes from warm water sources from underground soil. Geothermal energy comes from the heat generated by the Earth. There are some spots called hot spots that generate more heat than others. There are natural wells near Albania's border with Greece.

Is agrisolar a viable solution for a growing rural economy in Albania? About 20% of Albania GDP relies on agriculture that employs about 60% of the population (as of 2020). Hence, agrisolar (and agrivoltaic) projects are among the most effective solution for a growing rural economy.
