

# ANGOLA MESODYNE LIGHTCELL

---

How does mesodyne's lightcell convert fuel into electricity?

Mesodyne's LightCell converts fuel into electricity via light. Unable to load video. Try again later. Mesodyne's patented LightCell power generator converts any fuel into electricity via light. The core of the LightCell is a nanophotonic material that is engineered to only emit certain wavelengths of light when heated.

Why is mesodyne more efficient than traditional thermophotovoltaics?

Mesodyne's generator is significantly more efficient than traditional thermophotovoltaics because the light emitted by the nanophotonic material nearly perfectly matches what the PV cell can convert into electricity. Mesodyne's founders demonstrated the world record efficiency for this type of energy conversion in 2017 during their PhDs at MIT.

What is a lightcell & how does it work? With more than 10x the energy density of Li-Ion batteries, the LightCell enables people, sensors, autonomous vehicles - virtually any system that requires portable power - to perform their mission beyond what is possible today and extend range, endurance, and lethality across a multitude of platforms.

Why did mesodyne join Luminate? From there Mesodyne participated in Chain Reaction Innovations, the WERC Bench Labs Accelerator, the Air Force Techstars, the Air Force Mass Challenge, and now Luminate. When we joined Luminate, the goal was to expand our network, specifically in optics and photonics.

Who is mesodyne? We founded Mesodyne shortly after we demonstrated the world record efficiency for thermophotovoltaic energy conversion at MIT in 2017. At our advisors' recommendation, we took entrepreneurship classes, started to conduct customer interviews, and saw real interest in the technology.

# ANGOLA MESODYNE LIGHTCELL

Mesodyne's patented LightCell is a new class of power generator that converts fuel into electricity via light. Simply put, the LightCell enables portable, efficient, quiet, reliable, long

Mesodyne's primary industry is Electrical Equipment. Is Mesodyne a private or public company? Mesodyne is a Private company. What is Mesodyne's current revenue? The current revenue ???

Low vibration from Mesodyne's static conversion process is needed for accurate imaging. The LightCell increases the endurance of unmanned surface vessels and the remote sensors they carry 4-8 times compared to batteries (depending ???)

Mesodyne's patented LightCell??? power generator converts any fuel into electricity via light. The core of the LightCell is a nanophotonic material that is engineered to only emit certain ???

In Mesodyne's LightCell???, a microcombustor heats a nanoengineered photonic crystal material to incandescence, which shines light on the photovoltaic (PV) cell, generating electricity. My co-founder, Dr. Walker ???

Mesodyne's LightCell generator ??? about the size of a loaf of bread and roughly eight pounds ??? puts out five-to-10 times the wattage per pound of current tactical batteries, Veronika Stelmakh, CEO and co-founder of ???
