

ARE THERE ANY COMPULSORY COURSES IN THE NEW MARKET ENERGY STORAGE ELECTIVE COURSE

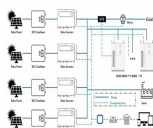

What is an energy storage course? An energy storage course is an accredited program that equips participants with the latest knowledge on how to select the most effective energy storage technology, understand grid-connected and off-grid systems, and evaluate the costs & pricing of available options.

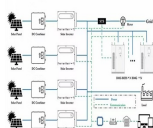

Why should you take a group energy storage course? Participating together, your group will develop a shared knowledge, language, and mindset to tackle the challenges ahead. This was an excellent course that entailed a proper exposition on current technologies and concepts for energy storage systems and the future of energy storage globally.

What professions participate in energy storage courses? Participants range from all kinds of professions: project managers, engineers, lawyers, entrepreneurs, and artists. Accredited courses trusted by over 5,000 professionals and organisations worldwide every year.

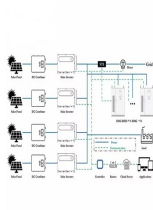

Is the course content a good learning experience? The course content was thorough and properly covered all the requirements of each module with the facilitators delivering above expectations. Summarily, the concepts taught are fully applicable in energy industries currently, and the learning experience has been truly worthwhile.

What is one year access to all courses in the program? One Year Access to All Courses in the Program Enroll in all the courses in the Energy Innovation and Emerging Technologies program. View and complete course materials, video lectures, assignments and exams, at your own pace. Revisit course materials or jump ahead ??? all content remains at your fingertips year-round.

ARE THERE ANY COMPULSORY COURSES IN THE NEW MARKET ENERGY STORAGE ELECTIVE COURSE

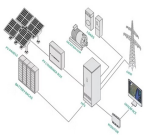

Personnel and consultants who are interested in implementing energy storage systems in their projects. Courses run on a regular basis. Please email training@theECT for more details. Certificate of Participation provided. On ???

compulsory subjects A compulsory subject is a subject you are required to study, but there may be many courses which include that subject and thus you may have a choice of which course to take. Required courses are ???

Identify energy storage applications and markets for Li ion batteries, hydrogen, pumped hydro storage (PHS), pumped hydroelectric storage (PHES), compressed air energy storage (CAES), flywheels, and thermal storage

Mechanical energy storage technologies such as megawatt-scale flywheel energy storage will gradually become mature, breakthroughs will be made in long-duration energy storage technologies such as hydrogen storage ???

Differentiate between clean renewable energy technologies such as wind, water, solar, and storage, and traditional and alternative energy sources and technologies such as coal, natural gas, hydrofracking, nuclear, and ???
