Will Azerbaijan generate 30% of its energy by 2030? Azerbaijan has set a target of generating 30% of its energy capacity from renewables by 2030. The country's total solar capacity reached 282 MW at the end of last year, according to figures from the International Renewable Energy Agency (IRENA). Azerbaijan's first-ever solar auction, for a 100 MW project, launched earlier this year.

Will Azerbaijan build two new solar projects? Azerbaijan has approved the construction of two new solar plants totaling 760 MW in the southeastern part of the country. Abu Dhabi Future Energy Co. (Masdar) will oversee the development of the projects. Utility-scale solar developer Masdar is set to develop two new solar projects in Azerbaijan.

Is Azerbaijan ready for green energy? Laying the foundation of 3 stations with a capacity of 1 GW is not only a first in the field of green energy in Azerbaijan, but also a bright indicator of our solidarity and commitment to the energy transition, said Shahbazov. Masdar completed a 230 MW solar plant in Garadagh, near Baku, in October 2023.

Who is constructing solar PV projects in Azerbaijan? The projects are developed in collaboration with Azerbaijan's state oil company SOCAR. Image: Masdar UAE state-owned renewable energy developer Masdar has started constructing two solar PV projects in Azerbaijan, with a combined capacity of 760 MW.

What is the power generation capacity of Azerbaijan? The total power generation capacity of Azerbaijan is 8320.8 MW, the capacity of the power plants on renewable energy sources, including large HPPs is 1687.8 MW, which is 20.3 % of the total capacity.
