The solar controller starts your generator allows it to power the house and recharge the battery to 100% and then turns off the generator. For the sun power system, I've read in the manufacturer documentation that it checks to make sure the solar is not able to produce enough electricity for the house and recharge the batteries.

In this regard, portable generators (PGs), battery energy storage systems (BESS) and solar panels (SPs) can provide the desired electricity backup, for some of the time at least. Frank Lev takes a closer look.
