The PowerBox Evo supports all current telemetry systems: PowerBox, Jeti, Futaba, Multiplex, Graupner, Spektrum and JR, which means that the voltage of both batteries can be monitored conveniently from the transmitter. It is also possible to read off the state of charge of the batteries at any time using the two tri-colour LEDs.

The PowerBox Pioneer is the latest development of a 14-channel power supply unit without voltage regulation, designed for HV servos. Since the unit has no voltage regulators, nor the large heat-sink surfaces required for them, it offers ultra-compact dimensions. Even so, the Pioneer still provides redundancy, as is the standard for all power supply units made by PowerBox ???

The iGyro 3xtra ushers in the second generation of the iGyro family. The new iGyro 3xtra boasts a completely revised regulatory algorithm and set-up procedure, expanded features and enormously enhanced performance, making it the new "State of the Art".. In contrast to its predecessor - the 3e - the new iGyro no longer incorporates delta and V-tail mixers.
