

What is the energy policy in Botswana? This Policy is calling for an increase in private sector development and the IEP will suggest various available options for financing of infrastructure projects and programs in the energy sector of Botswana. The Policy seeks to provide a conducive legal, fiscal and regulatory environment to attract investment into the energy sector.

Does Botswana need a capacity building program? In order to facilitate an effective development of the energy sector, the government of Botswana is obligated to build the necessary levels of human resource capacity across the board. Various actor groups have varying capacity needs hence capacity building programs should be tailored according to these various needs.

Does Botswana have a waste management policy? Botswana is also a signatory of the Basel Conventionwhich deals with the control of transboundary movement of hazardous waste and its disposal. Therefore, this policy recognises the need for proper waste disposal from the energy sector as well as handling of hazardous waste within the sector.

How has the energy sector impacted Botswana's Economic Development Prospects? Botswana has experienced some constraints in the energy sector in recent years, which to some extent have negatively impacted on the country???s economic development prospects. A devastating power supply and demand mismatch was encountered between the years 2008 and 2014, and this breached the country???s power supply security.

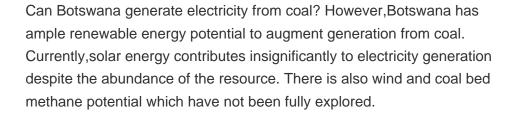

What are the modes of transport of petroleum products in Botswana? The adopted modes of transporting petroleum products are rail and roadwhich are not economic for the country. The industry is dominated by multinational oil companies and the prices for petrol, diesel and illuminating paraffin are controlled by the Botswana Energy Regulatory Authority

(BERA). Energy Resource Availability
