

BRUNEI FARADION LIMITED

About Faradion Ltd. Faradion is pioneering the next generation of advanced, low-cost battery materials. These novel materials employ sodium-ion (Na-ion) technology which, when incorporated into batteries, will be virtually indistinguishable in terms of performance from the leading lithium-ion (Li-ion) products currently on the market.

Funding, Valuation & Revenue. 5 Fundings. Faradion has raised \$3.94M over 5 rounds.. Faradion's latest funding round was a Acquired for on October 29, 2024.. Faradion's valuation in December 2021 was \$134.74M.. Faradion's latest post-money valuation is from December 2021.. Sign up for a free demo to see Faradion's valuations in January 2017 and more.

These novel materials employ sodium-ion (Na-ion) technology which, when incorporated into batteries, will be virtually indistinguishable from the leading products ???

Faradion was started in 2011, by Dr Jerry Barker, Dr Chris Wright and Ashwin Kumaraswamy, to develop and bring to market sodium-ion technology. It has developed a strategic, wide-reaching and extensive IP portfolio, comprising 21 patent families covering Na-ion technology. It was founded on the premise that sodium-ion batteries are cheaper and safer than lithium-ion,

Reliance New Energy Solar Ltd ("RNESE"), a wholly owned subsidiary of Reliance Industries Ltd., has signed definitive agreements to acquire 100% shareholding in Faradion Limited ("Faradion") for an enterprise value of GBP 100 Mn. In addition, RNESE will also invest GBP 25 Mn as growth capital to accelerate commercial roll out.

Reliance New Energy Solar Limited (RNESE), a wholly-owned subsidiary of Reliance Industries Limited (RIL), has entered into a definitive agreement to acquire Faradion Limited's entire shareholding for ₹100 million. ???

BRUNEI FARADION LIMITED

The project aims are to develop and demonstrate low cost 12V batteries for electrified vehicles. These batteries are used for lighting, security and control of the traction battery management system and other critical features. Generally, in electrified vehicles, these batteries use lead acid technology on account of their low cost and specialised requirements. ???
