

BULGARIA MOVA ENERGY

What is the electricity sector in Bulgaria? The electricity sector in Bulgaria is an important part of energy in Bulgaria and is highly diversified. As of 2021 nuclear power accounts for 34.7% of Bulgaria's power, coal power provides 39.4%, while renewable energy provides 15.8% of the country's electricity needs. [1]

Who is Mova energy? MOVA Energy is a pioneer in the field of digital energy. Reach out to us and learn how we help various energy companies in different countries to maintain and grow their customer base.

Does Bulgaria have a good energy sector? Bulgaria's energy sector is at a critical juncture, with two main objectives shaping its direction: decarbonization and reducing reliance on Russian energy. Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity, particularly in solar power.

How much energy does Bulgaria produce? Currently, the installed power generation capacity in Bulgaria is 13.247 MW, and the available capacity is 10,771 MW. To support its energy needs, Bulgaria imports natural gas, oil and oil products, and solid fuels (anthracite and black coal, coal coke). The main local energy source in Bulgaria is lignite coal.

What is the main source of electricity in Bulgaria in 2022? Coal energy was the main source of electricity production in Bulgaria in 2022. It accounted for over 45 percent of total electricity generation. Nuclear energy ranked second, making up 35 percent of total production.

Is Bulgaria getting more solar power? Over the past year, Bulgaria has made considerable progress in expanding its renewable energy capacity, particularly in solar power. Solar energy production has surged from one gigawatt (GWh) in 2019 to more than three GWh today, with solar

BULGARIA MOVA ENERGY

accounting for nearly half of the country's electric capacity from renewables.
