How can Egypt store electricity? Egypt has been looking at a number of ways to store electricity as part of its ambitions to grow renewable energy capacity to cover 42% of the country's electricity needs by 2030. These include upgrading its power grid and incorporating pumped-storage hydroelectricity stations to help store electricity for future use.

Could a superstructure tower integrate gravity energy storage? This render shows SOM and Energy Vault's proposed superstructure tower, a skyscraper which integrates gravity energy storage. Milan's Bosco Verticale, a vertical forest in Italian, is a tower for trees inhabited by humans, according to Boeri Studio, which designed the residential towers.

Does Egypt have more green space than Cairo? The city promises more green space than Cairo and landscaping has begun on the so-called "Green River," a series of parks and waterways amidst the city's recreational zones. Egypt is building a new city, known as the "New Administrative Capital," 30 miles east of Cairo.

Can batteries solve Egypt's Electricity oversupply problem? Egypt is exploring the potential of energy storage through batteries to combat our electricity oversupply problem: As Egypt continues to suffer from a major oversupply of electricity, the country is in need of new ways to tackle the issue.

What's happening in Egypt's new administrative capital? Construction of the Iconic Tower in Egypt's new administrative capital has begun. Housing Minister Asem al-Gazzar revealed the report and said that foundation works have commenced. The Iconic Tower is one of several Dubai-style mega projects being built in the new administrative capital.
