

CANADA SOLAR PANEL AGENCY

Who is Canadian Solar? It has grown into one of the world's leading manufacturers of solar photovoltaic modules and provide comprehensive solutions for solar energy and battery storage. Canadian Solar is also a developer of utility-scale solar power and battery storage projects with a geographically diversified pipeline in various stages of development.

Where can I install solar panels in Canada? As a Canadian-owned and operated company, we provide solar installation services in most major cities across Canada, including in Ontario, Alberta, Saskatchewan, British Columbia, Nova Scotia, Prince Edward Island, Newfoundland and New Brunswick.

Who is Canada's largest residential solar installation company? Having helped over 12,000 households go solar, we've grown to become Canada's largest residential solar installation company. Starting from Ontario in 2013, we quickly spread across Canada in late 2017 and now operate locally in five provinces (ON, AB, NS, BC and PEI), all while cementing ourselves as industry leaders in the Atlantic.

What business segments does Canadian Solar have? Canadian Solar has two business segments: CSI Solar and Recurrent Energy (formerly Global Energy). Canadian Solar's PV panel modules have very strong attractiveness in terms of their cheap price. This allows us to sell products to small enterprises. We use these panels in our installations because they are really good products.

Are Canadian solar panels a good investment? With more people turning to renewable energy, Canadian solar panels are leading the way to reduce carbon footprints and save property owners from rising and unpredictable energy fluctuations. Capitalize on this trend for sustainable energy today!

CANADA SOLAR PANEL AGENCY

How many employees does Canadian Solar have? It has more than 18,500 dedicated employees to strive each day to make this mission a reality. Canadian Solar has two business segments: CSI Solar and Recurrent Energy (formerly Global Energy). Canadian Solar's PV panel modules have very strong attractiveness in terms of their cheap price.

An estimate by the International Renewable Energy Agency suggests Canada could dispose of 800,000 tonnes of expired solar panels by 2050. As only about 10 per cent of solar panels are recycled, the waste problem will only intensify as the technology gains wider adoption across the globe.
