See our selection of hood solar panels. The Cascadia 4x4 VSS System is available for a range of vehicle brands including Jeep, Ford, Toyota, Landrover, and many more.

What is the Cascadia 44 VSS system? In short: The Cascadia 4x4 VSS System is an impressive product for SUV and truck owners who need some extra power when the vehicle isn't moving. This is especially true for outdoor adventurers who use their roofs for hauling big pieces of gear, an area that could otherwise be utilized for solar panels.

How many wires does a Cascadia 44 solar panel have? The solar panel has just two wires, positive and ground. You'll want to run a solar charge controller MPPT device between the panel and your house battery. Cascadia 4x4 offers these as an option, but our LR3 has already been upgraded with a RedArc BCDC125 DC-DC converter which is prewired for solar.

What is a hood-mounted solar system? Hood-mounted solar allows me to charge while stationary, without removing gear from my roof or setting up external panels at camp. Solar allows me to stay parked at camp and keep everything powered for days if there's sunshine, that is. Cascadia 4x4 gets my vote for instruction booklet of the year.

# CASCADIA 4X4 HOOD SOLAR PANEL BENIN

How long does a hood-mounted solar system last? It generally lasts 24 hours doing those tasks, but only charges when the car is running. Hood-mounted solar allows me to charge while stationary, without removing gear from my roof or setting up external panels at camp. Solar allows me to stay parked at camp and keep everything powered for days ??? if there's sunshine, that is.
