Our mission at Energy Central is to help global power industry professionals work better. Our Power Industry Network(R) platform is built to help our members connect with each other, share their knowledge & experience and advance their careers in the industry. Membership is open to professionals working at utilities and organizations supporting the industry.

Executive Summary. The Indian power sector, even as it grows exponentially, continues to face challenges from technical, social and geo-political factors - these affect the viability of the companies and even the sector as a whole. This paper reviews the current risk management practices in the Indian power sector based on the data shared by some notable ???

As part of an effort to clarify the potential of DERMS for the utility industry, the Smart Electric Power Alliance (SEPA) convened a task force of 12 utilities between late 2021 and 2022 to review DERMS vendors, discuss DERMS capabilities, understand architecture implications, and share information on utilities' respective experiences with DERMS and DERMS-like tools.

Energy storage technology provides a new direction for the utilization of renewable and sustainability energy. The objective of this study is to introduce a novel, wavy, longitudinal fin design, which aims to improve heat transfer in the melting process of a Latent Heat Thermal Energy Storage (LHTES) unit. to a finite volume discretization

The Enterprise Solar Storage Project, as proposed by Enterprise Solar Storage, LLC, is for the construction and operation of a photovoltaic (PV) solar facility and associated infrastructure necessary to generate 600 megawatts (MW) of renewable electrical energy with up to 4,000 megawatt-hours (MWh) of energy storage capacity (approximately ???)
