

CITIZEN 9105 ENERGY STORAGE TIME

How long can a Citizen Eco-Drive watch run? This stored energy helps run the watch for up to 6 months before it needs to be recharged, no matter if it was in total darkness. Yet, some models of Citizen Eco-Drive watches are built with an incredible power save function. So, it can run for a long time, up to seven years.

How does Citizen Eco-Drive work? With Citizen's patented Eco-Drive innovation, the watch absorbs light energy from natural and artificial sources. Once illumination hits the dial of the timepiece, it then picks up the energy generated by the light. Then passing it through the next vital component for the energy conversion.

How long does a citizen watch battery last? Moreover, it also reveals from the laboratory test that the secondary battery of the Citizen watch can retain its 80% initial power storage capacity. So, with proper care and maintenance, surprisingly, this rechargeable battery of the Eco-Drive watch can last well for up to 20+ years.

What is Citizen Eco Drive? Citizen's Eco Drive product line is a variety of watches engineered with a modern technology that harnesses energy from both artificial and natural light sources. The watch then stores this energy to a rechargeable lithium-ion power cell that they claim to last for a lifetime. This claim raised a lot of questions!

How do I Reset my Citizen Eco-Drive? Citizen recommends charging about 8 inches away from a 30-watt light. If the watch is fully charged and still not operating correctly, you may need to reset it: For analog models, pull the crown out to the time-setting position for 30 seconds, then push it back in. Set the time afterward. Most Eco-Drive issues stem from insufficient charging.

CITIZEN 9105 ENERGY STORAGE TIME

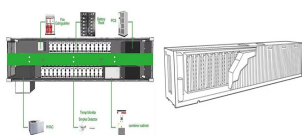

Do Citizen Eco-Drive watches die? The Citizen reports that the Eco-Drive watches don't need a battery ever, and thus, they offer a lifetime watch guarantee. It means that apparently, your watch is never going to die, much interesting!
