Do battery installations qualify for an investment tax credit? At the federal level, battery installations in the U.S. qualify for an Investment Tax Credit, ITC, provided the battery can be classified as solar equipment <sup>35</sup>. Specifically, this requires that the energy storage capability of the battery does not exceed the total energy generated by the solar PV system.

Can battery energy storage systems be included in electric power grid planning? Abstract: This paper provides an overview of methods for including Battery Energy Storage Systems (BESS) into electric power grid planning. The general approach to grid planning is the same with and without BESS, but when BESS is included as an alternative, other methods are necessary, which adds significant complexity to the planning problem.
