Can energy storage be used in Bangladesh? Concluded in May 2023, the assignment assessed available energy storage technologies, evaluated the role of energy storage in the current grid conditions, identified potential storage locations, analysed energy storage requirements under variable renewable energy (VRE) integration, and developed a roadmap for energy storage in Bangladesh.

Does Bangladesh have a clear vision for energy storage?
Bangladesh's energy policy framework does not articulate a clear vision for energy storage in the country. Existing planning activities can inform the development of a clear policy framework for energy storage that addresses the many services that storage can provide as well as the full range of storage technologies available.

Do you need a license for energy storage in Bangladesh? Rules defining activities that require licenses are included in the Bangladesh Energy Regulatory Commission Act, 2003 (BERC Act, 2003) (BERC 2003). Under these rules, a license is required and may be issued to any person for the purpose of energy storage.

Who governs Bangladesh's energy sector? At the national level, Bangladesh's energy sector is governed by the MPEMR. Within MPEMR's Power Division, the Power Cell is responsible for implementing various power sector reform activities, such as developing the Power System Master Plans. The latest PSMP was released in 2016, followed by an updated revision in 2018.

What's in the Bangladesh Power Sector Roadmap? The roadmap highlights specific use-cases for consideration in the Bangladesh power sector over three different future time horizons. It also includes a summary of indicative policy and regulation actions and interventions that may be considered to enable the deployment of energy storage within the defined time horizons.
