

DIFFICULTIES AND PROBLEMS FACED BY ENERGY STORAGE COMPANIES GOING OVERSEAS

Why is energy storage industry in China a big problem? Judging from the present condition, cost problem is the main barrier. And the high performance and high security of the relative technology still need to be improved. Until 2020, energy storage industry in China may not be spread massively and the key point during this period is the technology research .

What challenges do energy storage resources face? Energy storage resources present a distinct set of challenges given their unique nature: unlike conventional or renewable generation,energy storage resources must be charged with electric power,which will sometimes (but not always) be provided by the offtaker.

What are the problems limiting the commercialization of China's energy storage? Besides the objective technology immaturity,there exist other problems restricting the commercialization of China's energy storage including the high cost,incomplete technical standard system,imprecise evaluation system and imperfect policies. 3.1. Low technical-economic efficiency caused by high cost

Why is energy storage a problem? The lack of direct support for energy storage from governments, the non-announcement of confirmed needs for storage through official government sources, and the existence of incomplete and unclear processes in licensing also hurt attracting investors in the field of storage (Ugarte et al.).

What challenges hinder energy storage system adoption? Challenges hindering energy storage system adoption As the demand for cleaner, renewable energy grows in response to environmental concerns and increasing energy requirements, the integration of intermittent renewable sources necessitates energy storage systems (ESS) for effective utilization.

DIFFICULTIES AND PROBLEMS FACED BY ENERGY STORAGE COMPANIES GOING OVERSEAS

How to improve the commercialization of energy storage industry in China? The above problems have constrained the commercialization of energy storage industry in China. Therefore, we should take relevant measures, including reducing costs by all means, perfecting technical standards, establishing advanced benefits assessment system, and improving relevant incentive policies. 4.1. Reduce costs by all means
