

DOHA WATER STORAGE

What is the duration of water storage in Qatar's reservoirs? The objective of the project is to secure Qatar's water supply by providing seven days of potable water storage in the existing reservoirs, new mega reservoirs and the existing and future secondary reservoirs, with a quality that complies with Kahramaa and World Health Organization standards.

Does Qatar need a water storage project? To meet the demand, the country initiated the water storage project which includes sea water desalination as well as water storage and transmission. Upon completion, the water in the reservoir will be enough to meet the needs of the country for seven days. It will also provide clean water for the FIFA World Cup Qatar 2022.

How many mega reservoirs are being built in Doha? At five different sites around greater Doha area, new mega reservoirs are being built along with integrated pumping stations including more than 650 km of interconnecting water pipelines. The reservoirs and pipeline network, with associated pumping stations, will provide up to 17 million cubic meters of strategic potable water storage.

Does Qatar have a water mega reservoir? In 2010, Qatar only had around 48 hours' worth of water stored in case of emergencies. This led to the state-owned water utility company Kahramaa to invest in drinking water storage capacity. To increase the storage capacity, it began the Water Mega Reservoirs project.

What is the largest drinking water storage tank ever built? The Water Security Mega Reservoirs program, in Qatar, has entered the Guinness Book of Records as the Largest Drinking Water Storage Tank, ever built. CCC was responsible for building 5 potable water reservoirs / tanks of this major scheme developed by Qatar's General Electricity & Water Corporation (Kahramaa).

DOHA WATER STORAGE

What is the main source of domestic water supply in Qatar? Desalination is the main source of domestic water supply in Qatar, meeting about 50% of the total water demand. The public sector Qatar General Electricity and Water Corporation (Kahramaa), and Public Works Authority (Ashghal) are the main responsible entities for managing, sustaining, and implementing water infrastructure in Qatar.
