

DONGYA MACHINERY BELONGS TO THE ENERGY STORAGE SECTOR

How many energy storage companies are there in China? At present, there are nearly 90,000 registered enterprises involved in the energy storage industry, data from the China Industrial Association of Power Sources showed. According to the National Energy Administration, China's energy storage sector, hydropower storage excluded, will enter the stage of large-scale development in 2025.

What is the new-type energy storage manufacturing industry? According to an action plan jointly issued by the Ministry of Industry and Information Technology and seven other government organs, the new-type energy storage manufacturing industry refers to the sector that produces energy storage, information processing, safety control, and other products related to new energy storage methods.

How will China promote the new-type energy storage manufacturing sector? BEIJING, Feb. 17 -- Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging industries and the country's modern industrial system.

How can China improve international cooperation in the energy storage sector? To beef up international cooperation in the new-type energy storage sector, China will work to incorporate collaboration in the field into international cooperation mechanisms and frameworks such as the Belt and Road Initiative and BRICS and promote mutually beneficial cooperation on industrial and supply chains.

Why is China a leader in energy storage technology? Li added that China's dominance in energy storage technology, particularly in battery cell production, places it in a leading position to shape global storage standards. At the end of the first half, power storage capacity in China surpassed 100 GW, reaching 103.3 GW, a 47 percent year-on-year increase.

DONGYA MACHINERY BELONGS TO THE ENERGY STORAGE SECTOR

Is China's energy storage sector growing? According to the report, China's energy storage sector has maintained a rapid growth momentum from 2023, with new energy storage capacity expanding from 8.7 million kilowatts in 2022 to 31.39 million kW last year. On the other hand, new energy storage plants in China are increasingly shifting toward centralized, large-scale installations, it said.

At the 13th Energy Storage International Summit and Exhibition in Beijing, DONGYA Electronics not only highlighted its product and technological strengths but also leveraged opportunities to a?
