Eaton's Cooper Power series CL-7 voltage regulator control maintains the easy-to-use interface of previous CL controls, but with advanced smart grid features is designed with the future in mind. It comes as standard equipment on Eaton's Cooper Power series voltage regulators, but can be applied to operate nearly any voltage regulator in service today.

Cooper Power Systems products meet or exceed all applicable industry standards relating to product safety. We actively promote safe practices in the use and maintenance of our products through our service literature, instructional training programs, and the continuous efforts of all Cooper Power Systems employees involved in product design,

Eaton leads the industry in the application of single-phase voltage regulators into substations regulating loads up to 60 MVA. With features such as fan cooling and insulating fluid filtration, substation voltage regulators provide a viable option superior to the use of On-Load

systems operating through 34.5 kV (see Ratings and Specifications section of this catalog). These ratings and the wide range of programmable settings provided by Eaton's Cooper Power series electronic controls permit meeting a variety of application requirements. Recloser operation Fault currents are sensed by three 1000:1 ratio sensing current

Cooper Power Systems, a subsidiary of Eaton Corporation PLC, is at the forefront of voltage regulator manufacturing, addressing the escalating demands for power distribution infrastructure essential for electrification, grid modernization, and resilience.

single-phase Cooper Power Systems SPEAR reclosers and controls to distribution lines can meet today's system reliability needs and easily transition for future Smart Grid applications. Eaton, ???

Eaton's Cooper Power series VACpac underground distribution vacuum switchgear is used to switch load, loop, capacitor and cable charging as well as magnetizing currents. Ideal applications include underground vaults, submersible, high-rise building, mining operations, campus and computer-controlled switching installations.

Eaton's Cooper Power??? series CL-7 is the latest voltage regulator control. The CL-7 control maintains the easy to use interface of previous CL controls. Advance features enable easy integration into a smart grid ??? 50 Hz Systems o Select the 15 ? 1/4 F capacitor for 14.4 kV and below voltage regulators rated 219 A and below.
