

ECUADOR SOGA ENERGY

Who is Soga energy? SOGAENERGIES is the division of Soga Energy Team for energy special projectssince 2008,focusing on the advancement of cutting-edge solutions up to 1 MW for applications as renewables (wind,hydro),hybrid systems,automotive,marine,military.

Who uses natural gas in Ecuador? Natural gas in Ecuador is mostly used by the industry sector1. Hydropower in Ecuador is a significant source of electricity generation given the country???s geographical features,such as the Andes Mountains and the Amazon rainforest. Hydropower accounted for 79.1% of total electricity generation in 2021,up from 55.4% in 2011.2 Figure 1.

Why is the Ecuadorian electricity sector considered strategic? The Ecuadorian electricity sector is considered strategic due to its direct influence with the development productive of the country. In Ecuador for the year 2020,the generation capacity registered in the national territory was 8712.29 MW of NP (nominal power) and 8095.25 MW of PE (Effective power). The generation sources are presented in Table 1.

Is there a potential for electricity generation in Ecuador? Based on what has been described,it is identified that there is a high potentialfor electricity generation in Ecuador,especially the types of projects and specific places to start them up by the central state and radicalize the energy transition.

Does Ecuador have a natural gas market? Ecuador's natural gas market is less developed than its oil sector; it has a 0.9% share of total energy production and 1.7% share of energy consumption (Figure 1). Natural gas in Ecuador is mostly used by the industry sector1.

ECUADOR SOGA ENERGY

What is the main source of energy in Ecuador? Petroleum and other liquids continue to be Ecuador's primary source of energy; crude oil accounted for 63.4% of total energy consumption in 2021. The country has significant oil reserves and is one of South America's top oil producers.

Ecuador Total Energy Consumption. Per capita energy consumption is around 0.86 toe, a level 34% below the South American average (2022). Per capita electricity consumption is approximately 1 500 kWh. Energy consumption rose by 5% in 2022 (15.4 Mtoe), after falling by 12% in 2020 and rebounding by 9% in 2021. Previously, it had been roughly

-2024 Ecuador electricity crisis was caused by a severe drought that depleted water levels at hydroelectric plants and a lack of capacity buildup. Ecuador experienced rolling blackouts for up to 14 hours per day in the fall crisis (started on 23 September 2024) of 2024. Researches describe fall 2023 (27 October???18 December 2023) and spring 2024 (16???30 April 2024) crises as separate events. The President of Ecuador Daniel Noboa had announced on 10 December, 202???
