Where can solar power be developed in Egypt? Utility-scale PV development has, thus far, clustered around Aswan in the south of the country, where solar resources are strongest and there is plenty of land for development. The biggest chunk of Egyptian solar capacity is provided by the Benban project, which lies 50 km from Aswan and is one of the world's biggest PV sites.

How much solar power does Egypt have? The biggest chunk of Egyptian solar capacity is provided by the Benban project, which lies 50 km from Aswan and is one of the world's biggest PV sites. Official figures on its capacity vary from 1.4 GW up to 1.8 GW, with the confusion apparently centering on the scope for expansion of some individual elements.
