In 2023, Emtec Energy expanded its apprenticeship program for clean energy enthusiasts, shaping the industry's future with hands-on experience. Our team's growth brought diverse skills, contributing to our continued success. Committed to excellence, we celebrated well-deserved promotions, recognising and nurturing exceptional leadership.

Emtec Energy delivers turnkey solutions in the energy and renewable technology sector, concentrating primarily on solar PV and battery storage. Our focus on health & safety, innovation, and minimizing client disruption set us apart. To date, we have delivered over 22MW of solar PV, and installed over 7MW of SolarEdge technology alone.

South Korea's Ministry of Trade, Industry and Energy (MOTIE) announced plans to expand carbon-free energy (CFE) supply to boost export competitiveness and meet global carbon regulations. The initiative aims to decarbonize corporate power usage and achieve carbon neutrality in industrial processes, with support from eight countries, including the U.K., France ???

We're excited to showcase our latest solar PV project with BRAY CONTROLS (UK) LIMITED at their site in Inchinnan. This impactful collaboration saw the Emtec Energy team deliver a bespoke rooftop solar solution, designed to help Bray Controls take a significant step toward sustainability and energy self-sufficiency. ???????? Key Project Highlights: ???? System Size: 207.71 kWp Solar PV Roof

Pioneering the Future of Energy with the People Korea energy agency. KEA is a public agency that carries out national energy policies for energy efficiency improvement, new and renewable energy dissemination and climate change mitigation for smart and efficient demand side management based on Energy Use Rationalization Act.

Emtec Energy is proud to announce its recognition as Contractor of the Year 2024 at the prestigious Solar & Storage Live Awards, held at the NEC, Birmingham. This accolade highlights Emtec Energy's exceptional contributions to the renewable energy industry and cements its reputation as a leader in solar engineering and construction.

# EMTEC ENERGY SOUTH KOREA

Emtec Energy's meticulous approach, including site surveys and the utilisation of 1915 solar PV modules and 14 SolarEdge inverters, resulted in an annual green energy production of 669,622 kWh. This initiative not only enhances Smith Anderson's energy independence and financial resilience but also significantly offsets 314,475 kg of carbon

South Korea's top 8 exporters consume 4 times more electricity than generated by wind and solar in 2020. South Korea's biggest companies could lose a key competitive edge over the next decade, as they struggle to secure critical supplies of domestic renewable energy, without a significant boost from the incoming Yoon administration.

A significant reason for South Korea to accelerate this transition lies in the country's need for energy independence. South Korea currently imports around 93% of its energy???primarily coal, oil, and natural gas???from foreign markets such as the Middle East, Australia, and the U.S. This heavy reliance on imports not only exposes the country

Emtec Energy's holistic approach includes designing efficient systems, implementing energy storage solutions, and ensuring seamless grid integration. As the commercial solar industry gains momentum in 2024, Emtec Energy's promotion of sustainable energy solutions is proving instrumental in assisting businesses to make the transition towards
