How will the new EIB financing help Bhutan? The new projects, to be implemented by Druk Green Power Corporation, will contribute to climate action, helping Bhutan to strengthen its energy security and increase the use of renewable energy. The new EIB financing will support the installation of an estimated 310 MW of hydropower and solar power generation capacity.

What is the EIB project in Bhutan? The first-ever EIB project in Bhutan, one of just three net carbon-negative countries in the world, supports new solar photovoltaic and hydropower schemes under the EU's Global Gateway initiative. The 30-year loan for 150 million will unlock an estimated 310 MW of new renewable energy generation to serve communities in remote regions.

Will EIB finance hydro power plants in Bhutan? EIB framework loan to finance hydro power plants (expected in the range of 25 - 75 MW) and solar PV plants in Bhutan. The European Investment Bank (EIB), the world's largest multilateral bank and leading global financier of renewable energy, signed its first-ever investment support for Bhutan today.

Why does Bhutan use solar power? To meet its annual power needs, Bhutan uses solar power alongside hydropower in a complementary manner. This promotes climate adaptation by diversifying the power generation portfolio, a systemic approach that builds resilience against climate change impacts.

Should Bhutan diversify its energy sources? In the face of climate change and the need for enhanced energy security, the business case for Bhutan to diversify its energy sources, especially by tapping into alternative renewable energy, is compelling. Bhutan is yet to realize its full potential in terms of renewable energy.
