

ENERGY STORAGE BATTERY FLASHES

RED LIGHT

What does it mean if the battery lights flash red? If the battery lights begin to flash red, the battery is too hot to charge. The unit will turn on cooling fans and the battery will begin charging once it gets to approximately 70 degrees Fahrenheit. If the charging lights blink red then green, the battery cartridge can not be charged. This means the battery is likely damaged or worn out.

Why is my battery tender battery charger flashing red? My Battery Tender battery charger is flashing red! Firstly, don't panic! There are a few things you can look at to see what the problem may be: Your connection may be incorrect. Double-check all connections from the unit to the battery. Check the fuse on the positive cable of the quick disconnect, located about one inch away from the battery.

Why are my lights flashing red to Green? If the lights on your unit are flashing from red to green, we first recommend double-checking the unit on a known good battery. A good example of this is the battery in your everyday vehicle. If the unit goes through the cycle charge while connected to your everyday vehicle, then we suggest getting the battery that wasn't working checked out.

What does a red alarm light mean? Just set the equalise voltage to be the same as the absorb/CV battery voltage setting. That way, the red ALM light will only ever mean "serious fault, don't ignore". Alarm red light for "sleep mode" is a terrible user interface. On 2020/08/14 at 11:36 AM, phil.g00 said:

Why is my battery tender charging light green? If the lights still alternate from red to green, there's a chance that the unit itself is experiencing issues. At this point, we recommend reaching out to the Battery Tender customer service team for assistance. My charging light has been on for hours and still has not turned green. Is my Battery Tender battery charger broken?
