---

Will energy storage company ESS go public? Long duration energy storage company ESS Inc. is publicly listing its stock through a merger with a special purpose acquisition company (SPAC), the latest storage startup to go public through the expedited strategy.

How much is corporate funding for battery energy storage? A more recent report by the research outfit reveals that total corporate funding (including VC, Debt, and Public Market Financing) in battery energy storage came to \$4.7 billion in 17 deals compared to \$3.1 billion in 19 deals in Q4 2020. Funding was up significantly year-over-year (YoY) compared to \$244 million in nine deals in Q1 2020.

What is LG Energy Solution's IPO worth? LGES is one of the world's top electric vehicle (EV) battery makers, supplying the likes of Tesla (NASDAQ:TSLA) and General Motors Co (NYSE:GM). LG Energy Solution applied for preliminary approval of an IPO that publication IFR says could fetch \$10 billion-\$12 billion, easily South Korea's biggest-ever listing.

How long can ESS batteries store energy? ESS batteries can store energy for four to 12 hours, whereas the lithium batteries in cars are typically capped between two and four hours, Dresselhuys said. To go above four hours of energy storage with lithium-ion batteries requires increasing the number of lithium-ion cells, Hossfeld told CNBC.

What is a long-duration energy storage battery? The company's proposed solution is long-duration energy-storage batteries made of iron, salt and water, which are much cheaper and more readily available than the elements used in batteries today, such as lithium and cobalt.
