

ENERGY STORAGE EQUIPMENT INVESTMENT SCALE ANALYSIS AND DESIGN PLAN

Are energy storage systems a barrier to industry planning and development? As a promising solution technology, energy storage system (ESS) has gradually gained attention in many fields. However, without meticulous planning and benefit assessment, installing ESSs may lead to a relatively long payback period, and it could be a barrier to properly guiding industry planning and development.

What is energy storage system (ESS)? With the large-scale integration of centralized renewable energy (RE), the problem of RE curtailment and system operation security is becoming increasingly prominent. As a promising solution technology, energy storage system (ESS) has gradually gained attention in many fields.

How can big data industrial parks improve energy storage business model? Combined with the energy storage application scenarios of big data industrial parks, the collaborative modes among different entities are sorted out based on the zero-carbon target path, and the maximum economic value of the energy storage business model is brought into play through certain collaborative measures.

What factors influence the business model of energy storage? The factors that influence the business model include peak???valley price difference, frequency modulation ratio of the market, as well as the investment cost of energy storage, so this paper will discuss from the following perspectives.

How can energy storage benefits be improved? By adjusting peak and valley electricity prices and opening the FM market, energy storage benefits can be greatly improved, which is conducive to promoting the development of zero-carbon big data industrial parks, and technical advances are beneficial for reducing investment costs.

What are energy storage capacity configuration schemes? According to their characteristics, two energy storage capacity configuration schemes are set up, including local storage of surplus electricity and local balance of surplus electricity for Internet access.
