Italy's grid operator, Terna, will tender for 12GW-15GW and 71GWh of energy storage by 2030, with fixed-price, long-term contracts available, while the government is expected to tender also for utility-scale BESS and soon issue a regulated BESS investment framework. 7. ???

A 2.5MW / 4MWh demonstration system using novel energy storage technology based on a "carbon dioxide battery" has begun construction in Sardinia, Italy. The CO2 battery technology has been developed by Energy Dome, a Milan-headquartered company founded by technologist and entrepreneur Claudio Spadacini and incorporated two years ago.

The market for battery energy storage is estimated to grow to \$10.84bn in 2026. The fall in battery technology prices and the increasing need for grid stability are just two reasons GlobalData have predicted for this growth, with the integration of renewable power holding significant sway over the power market.
