---

How long will a gas storage facility last in Slovakia? Its construction should last about one year. The current underground gas storage capacity in Slovakia is about 3 billion cubic metres. The existing facilities are operated by companies Nafta and Pozagas. Another locality suitable for construction of a gas storage facility is in Ptruksa in eastern Slovakia.

What is the capacity of energy storage facility? Energy storage facility of a cumulative installed capacity of 384 MW, storage capacity allowing a net annual electricity generation of 250 GWh. The storage will consist of several smaller units (~32-64MW) located in Slovakia (central Europe).

Is Slovakia facing a shortage of R&D workers? Strategy, especially applying to the automotive industry. It is clear that Slovakia is facing a shortage of critical workers in R&D, with only around

Will Slovakia become part of international consortiums? Slovakia to become part of international consortiums. Full automation of public and rail transportation systems should happen before individual transportation, where the goal is to flatten vehicle purchases. Rather than traditional vehicle ownership, the new trend follows a business model where a car is sold to

We provide tailor-made commercial solutions for the use of stationary battery storage in combination with a renewable source. sources and meet our future energy needs is also associated with a 50-fold increase in installed battery ???
