

ENERGY STORAGE INVERTER DRIVER BOARD WIRING DIAGRAM

What is a StorEDGE inverter? StorEdge inverter for High Power. The StorEdge Connection Unit, located at the bottom of the inverter, allows simple installation and connectivity to other system components and includes a DC Safety Switch.

How to connect a battery to an energy storage inverter? 10 10.4 It should be > 6 AWG. Connect the positive and negative poles of the battery to the positive and negative terminal of the DC port of the energy storage inverter (or the junction box) with a red and black cable respectively. The connection of several batteries is only permitted in parallel.

How do I terminate a RS485 inverter if no energy meter is connected? If no Energy Meter is connected, terminate the inverter's RS485 bus by switching the left DIP switch ON. Use the checklist below to verify that the system is properly connected and configured.

How do I connect a StorEDGE inverter? Install the fuses in the holders on the top board of the StorEdge Connection Unit . Connect the string to the DC input pairs. If required, connect additional strings in parallel using an external combiner box/branch cables before connecting to the inverter.

How do I connect my inverter to the SolarEdge Monitoring Platform? If not already ON - Turn ON the AC to the inverter by turning ON the circuit breaker on the main distribution panel and turning on the StorEdge Connection Unit (if applicable). 3. Wait for the inverter to connect to the SolarEdge monitoring platform. This may take up to two minutes.
-----OFF

How do I configure the inverter? Configuration is done when the inverter is in Setup mode. 1. Turn the inverter ON/OFF switch to OFF (AC remains ON). **WARNING!** If the inverter was operating properly (power was produced by the power optimizers), the following message is displayed. This message is displayed until the DC voltage is safe (50V).
