

ENERGY STORAGE NEWS

Adapted from a news release by the Department of Energy's Argonne National Laboratory.. Today the U.S. Department of Energy (DOE) announced the creation of two new Energy Innovation Hubs. One of the national hubs, the Energy Storage Research Alliance (ESRA), is led by Argonne National Laboratory and co-led by Lawrence Berkeley National a?|

ETN news is the leading magazine which covers latest energy storage news, renewable energy news, latest hydrogen news and much more. This magazine is published by CES in collaboration with IESA.

Energy-Storage.news" publisher Solar Media will host the eighth annual Energy Storage Summit EU in London, 22-23 February 2023. This year it is moving to a larger venue, bringing together Europe's leading investors, policymakers, developers, utilities, energy buyers and service providers all in one place. Visit the official site for more info.

The Long Duration Energy Storage Council, launched last year at COP26, reckons that, by 2040, LDES capacity needs to increase to between eight and 15 times its current level a?? taking it to 1.5-2

Australia's National Electricity Market (NEM), which covers wholesale electricity markets across most of the country, introduced several rule changes throughout 2021 and has indicated more on the way, but this was the one that appeared to most interest Energy-Storage.news readers this year.

ENERGY STORAGE NEWS

Redoxblox uses a chemically reactive metal oxide to pack more energy into its thermochemical storage systems aimed at industrial decarbonization. (Redoxblox) The island has ambitious climate goals and a ton of rooftop solar, but has so far built few large-scale clean energy projects. Project Marahu

The MITEI report shows that energy storage makes deep decarbonization of reliable electric power systems affordable. "Fossil fuel power plant operators have traditionally responded to demand for electricity a?? in any given moment a?? by adjusting the supply of electricity flowing into the grid," says MITEI Director Robert Armstrong, the Chevron Professor a?|

And because there can be hours and even days with no wind, for example, some energy storage devices must be able to store a large amount of electricity for a long time. A promising technology for performing that task is the flow battery, an electrochemical device that can store hundreds of megawatt-hours of energy a?? enough to keep thousands
