

# ENERGY STORAGE PROJECT GETS RECORD

How many energy storage projects were completed in the second quarter? 1,680 megawatts of energy storage projects were completed in the second quarter, the highest ever for a single quarter, according to a report issued this week by Wood Mackenzie, a research firm, and the American Clean Power Association, a trade group.

Where are battery energy storage systems coming from? Rho Motion noted big projects in Saudi Arabia and Hubei, China, and reported the only non-lithium-ion sites were three Chinese vanadium flow batteries. London-based analyst Rho Motion says it has tracked a January-record 13.6 GWh of new global battery energy storage systems (BESS) during the first month of 2025.

Which energy storage projects are being deployed in China? With two-thirds of the month's new BESS being deployed in China, Rho Motion reported the nation's energy storage projects included a 1.2 GWh project in Hubei province and the only three non-lithium-ion BESS activated during the month: vanadium flow batteries with a total storage capacity of 90 MWh.

How many megawatts is a residential energy storage project? This is a huge project. The storage portion of 2,165 megawatts is still under development. Several hundred megawatts are already operational. Residential energy storage projects had a significant decrease in installations in the second quarter, particularly at houses and apartments in California.

What's new in energy storage in the second quarter? In the second quarter, all new storage projects involved batteries. The largest project, with a capacity of 350 megawatts, was the third phase of Moss Landing Energy Storage in California, which went online in June.

# ENERGY STORAGE PROJECT GETS RECORD

Which states are hogging Bess energy storage capacity in 2025? In the United States, the analyst said, California and Texas are hogging 61% of the BESS deployments planned this year but the states of Wisconsin, Oregon, Minnesota, Idaho, Indiana, and New Mexico are planning to install almost 9 GWh of battery energy storage capacity, between them, in 2025.

From pv magazine Australia. Solar and storage analyst Sunwiz said 2023 was the year of the big battery, with a record number of large-scale battery energy storage systems featuring almost 1 GW/1.5

The approved project, a 20 MW/40 MWh BESS, will be strategically installed at BRPL's 33/11 kV Kilokari substation and is on track to be the fastest BESS project to be commissioned, with a record time of 18 ??? 20 months from ???

Eve Energy plans to set up an energy storage company in Malaysia and acquire a Phase II plot to begin construction of an energy storage plant, according to the statement. The Malaysian government released its ???

Rho Motion noted big projects in Saudi Arabia and Hubei, China, and reported the only non-lithium-ion sites were three Chinese vanadium flow batteries. London-based analyst Rho Motion says it has tracked a January ???
