## BOARD PICTURE

---

What is long-duration energy storage (LDEs)? This long-duration energy storage (LDES) project aims to be a key demonstration of critical power backup of an acute care hospital in the U.S. and provide resiliency in a region that is increasingly at-risk for significant power outages due to fires, storm surges, floods, extreme heat, and earthquakes.

Who is involved in the Edwards & Sanborn solar & energy storage project? From pv magazine USA Terra-Gen and Mortenson have announced the activation of the Edwards & Sanborn Solar + Energy Storage project, the largest solar-plus-storage project in the United States. Mortenson served as engineering, procurement, and construction contractor for the project.

What is BLM's new energy storage project? BLM approved the project in May 2021, marking the first standalone energy storage project to be approved on BLM lands under the Biden-Harris administration. ??? The project represents another major step forward in the Biden-Harris administration's goal of a carbon pollution-free power sector by 2035.

Where is BLM energy storage project located? The project is located in the California desert on Bureau of Land Management (BLM) lands. BLM approved the project in May 2021, marking the first standalone energy storage project to be approved on BLM lands under the Biden-Harris administration.

When did Recurrent Energy start developing Crimson storage? ??? Recurrent Energy began developing Crimson Storage and our larger energy storage pipeline in 2015 when no large-scale storage projects yet existed. Last year, we started bringing these projects to fruition also thanks to our CSI Energy Storage team.

What does OE's new RD&D report mean for energy storage? New Report Showcases Innovation to Advance Long Duration Energy Storage (LDES): OE today released its new report ???Achieving the Promise of Low Cost LDES.??? This report is one example of OE???s pioneering RD&D work to advance the next generation of energy storage technologies.

The US Department of Energy is funding a pilot project to demonstrate the commercial viability of storing energy in heated sand, which is capable of producing 135 MW of power for five days.

Pumped storage projects move water between two reservoirs located at different elevations (i.e., an upper and lower reservoir) to store energy and generate electricity. Generally, when electricity demand is low (e.g., at night), excess electric generation capacity is used to pump water from the lower reservoir to the upper reservoir. When electricity demand is high, the ???

The Minister of Electricity and Energy, Hon. Dr. Kgosientsho Ramokgopa, is pleased to announce the successful signing of the Projects Agreements and Commercial Close of the first two Projects appointed as Preferred Bidders under the first Battery Energy Storage Independent Power Producer Procurement Programme (BESIPPPP) Bid Window 1.

This FOA is in coordination with DOE's Office of Clean Energy Demonstrations (OCED)'s Notice of Intent to fund \$100 million for Long-Duration Energy Storage Pilot projects, focusing on non-lithium technologies, 10+ hour discharge energy systems, and stationary storage applications. These opportunities complement DOE's Industrial

A third proposal, for a project in the mountains above Gorman (though it's listed as Tehachapi) has an approved preliminary permit from FERC.. That doesn't mean anyone will be bulldozing hillsides anytime soon, though. A preliminary permit is sort of a placeholder giving the company time to do feasibility studies and gather financing to, perhaps, someday, apply for a ???

Energy storage could also be a key piece of grid resiliency. Wider storage deployment would have made a difference last February during the four-day cold snap in Texas. The big picture points to a growing role for storage. Project Finance News. For developments affecting project finance and the energy sector. Norton Rose Fulbright LLP

Strata Clean Energy's Inland Empire Energy Storage was awarded a 15-year Resource Adequacy Agreement with Energy Settlement by Pacific Gas & Electric (PG& E), which filed an Advice Letter at the California Public Utilities Commission for approval of 6,396 megawatt hours (MWh) of new and incremental utility-scale battery energy storage systems (BESS).

DOE/WPTO through the Notice of Opportunity for Technical Assistance process. For these two projects, the project team conducted various technoeconomic studies to assess the value of their projects, the Goldendale Energy Storage Project (GESp). This report is a companion to the . PSH Valuation Guidebook. 1. The purpose of this companion

Jupiter Power is proposing to build and operate the Streamfield Energy Storage Facility, a 200-megawatt battery energy storage system in Westfield, Massachusetts. Photo above: THE PROPOSED FACILITY SITS ON A 19- ACRE PARCEL NORTH OF (OPSB) website under Case Number: 23-0145-EL-BGN: Prairie Flyer Energy Storage. Further updates to

## BOARD PICTURE

It is located at Poolbeg Energy Hub, where ESB ??? around 95% owned by the Irish state with the remaining stake held by its employees ??? is planning to deploy a combination of clean energy technologies, including offshore wind, hydrogen, and battery storage, over the coming decade. "Energy storage like this major battery plant at the ESB's

The Project will consist of lithium-ion energy batteries installed on racks, inverters, switchgear, and other associated equipment to directly interconnect into the Southern California Edison Highgrove Substation (point of interconnection) located immediately adjacent to the north of the Project site. The energy storage batteries will be housed

Sembcorp has a balanced energy portfolio of 16.4GW, with 9.5GW of gross renewable energy capacity comprising solar, wind and energy storage globally\*. The company also has a proven track record of transforming raw land into sustainable urban developments, with a project portfolio spanning over 13,000 hectares across Asia.

Lawyer John Leonti said that the FERC interconnection reform process is another side of the coin to other big picture efforts in the US, such as the Inflation Reduction Act (IRA) and its introduction of investment tax credit (ITC) incentives for standalone storage, that make it "an exciting time for batteries". "It just goes to show that the (Biden-Harris) ???

The project is the construction and operation of a utility scale battery energy storage system comprised of lithium-ion batteries and control equipment housed in either a single-story building or a series of purpose-built free-standing enclosures. The project would connect to the existing Southern California Edison (SCE) Laguna Bell substation

This long-duration energy storage (LDES) project aims to be a key demonstration of critical power backup of an acute care hospital in the U.S. and provide resiliency in a region that is ???

dispatch of energy storage devices." This proposal was intended to encourage private ownership and operation of energy storage devices and the development of a robust energy storage sector in New Jersey's restructured competitive market. 1.1 What are the advantages and disadvantages of utility control versus non-utility control of

Project Overview . The Water Authority and City of San Diego are evaluating the feasibility of developing a pumped storage energy project at the City of San Diego's San Vicente Reservoir near Lakeside. It would store 4,000 megawatt-hours per day of energy (500 megawatts of capacity for eight hours), enough energy for about 135,000 households.
