What is RWE's new solar farm Kerkrade? The solar farm Kerkrade in the Province of Limburg is set to have a capacity of more than 14 megawatts (MW) and will further strengthen RWE's renewables business in the Netherlands. The Dutch company Volta Solar is responsible for all construction works as RWE's service provider.

Who is SSE Renewables? SSE Renewables develops,builds and operates renewable energy technologies that are needed today and deliver energy security tomorrow. Behind SSE Renewables' vision and strategy are experienced,dedicated,skilled and talented people: they make the ambitious plans for a better future a reality.

How many battery racks will RWE install in Eemshaven? The company has now finalised its investment decision for a Dutch battery storage project with an installed power capacity of 35 megawatts (MW) and a storage capacity of 41 megawatt-hours (MWh). A total of 110 lithium-ion battery racks are to be installed at RWE's biomass plant in Eemshaven on an area of around 3,000 square metres.

Does Eemshaven produce electricity? In Eemshaven,15% of the electricity is generated using biomass. The third division Hydro &Storage has no production installations in the Netherlands. Primarily comprising water reservoir storage power plants in Germany,it also includes two special products: coal mine gas and biogas.

Why should you join SSE Renewables? Behind SSE Renewables??? vision and strategy are experienced, dedicated, skilled and talented people: they make the ambitious plans for a better future a reality. Will you join us in making that better future happen?

RWE is expanding its battery storage business with an innovative technology for grid stability. The company has begun construction of an ultra-fast battery storage system with an installed capacity of 7.5 megawatts (MW) and a storage capacity of 11 megawatt hours (MWh) on the site of its power plant in Moerdijk, in the Netherlands.

Furthermore, the growth in the renewable energy market has to take a good turn. This is because the prices of renewable energy are steadily decreasing. This decrease will likely sustain the renewable energy market even without the government's input. For example, biomass used to take up to 60.7% of the renewable energy usage in the Netherlands.

In Het Financieele Dagblad, director of SSE Renewables Netherlands, Jasper Vis, says that despite rising costs, he sees a bright future for Dutch offshore wind ??? as long as quality, and not financial criteria, continues to dominate bids.
