Who makes NaS batteries? Japan-headquartered NGK Insulators is the manufacturer of the NAS sodium sulfur battery, used in grid-scale energy storage systems around the world. ESN spoke to Naoki Hirai, Managing Director at NGK Italy S.r.l. What is the history of NAS batteries and how have they progressed from early R&D to commercialisation?

Does BASF sell NaS batteries? Today, BASF not only distributes the NAS battery worldwide, it is also working with NGK on the next generation of sodium-sulfur batteries, with product launches forthcoming in 2024. To learn more about NAS batteries, visit the BASF website [here](#).

How long does a NaS battery last? Designed to discharge energy for 6 hours or longer, NAS battery units are scalable to hundreds of megawatt-hours. While having a high energy density and fast response time, the systems also convince by a design life of 20 years, or 7,300 operating cycles due to a very low degradation level.

What is a NaS battery? Already proven by more than 20 years of deployment in the field in more than 250 projects for industry and utilities with the total output of almost 5GWh, the NAS battery is one of the most mature long-duration technologies today. NAS batteries are suitable for a wide range of climate conditions, as this project in Dubai, UAE, shows.

Are NaS batteries suitable for climate conditions? NAS batteries are suitable for a wide range of climate conditions, as this project in Dubai, UAE, shows. Image: NGK Insulators Ltd. Designed to discharge energy for 6 hours or longer, NAS battery units are scalable to hundreds of megawatt-hours.

Are NaS batteries cost-competitive? Besides the stability of raw materials pricing and their ideal technological fit for applications of 6 hours and beyond, another important aspect of the NAS battery is its cost-competitiveness is low Opex: Arriving on site in containerised
