What is Fiji's energy policy? This Policy will ensure that Fiji's agricultural sector and local industries can benefit from a further source of sustainable, indigenously-sourced energy while minimising any potential impacts on the environment or national food security.

What is Fiji's Energy Trilemma? As is the case in most national contexts, the oversight of Fiji's energy sector is defined by the energy trilemma which requires continual efforts to balance the challenges of energy security, energy sustainability, and energy access/equity.

What is the energy situation in Fiji? It is a small island developing state (SIDS) that is heavily dependent on imported fossil fuel for its energy needs. The paper attempts to determine the past and current energy situation in Fiji, challenges faced and strategies to overcome these challenges. In 2014, Fiji generated 859 GWh of grid electricity from 259.8 MW of power plants.

Does Fiji have electricity? The rest of the islands in Fiji are electrified through diesel generator sets, micro hydro systems or generators running on biofuel. The electrification of the off-grid population comes under Fiji Department of Energy (FDoE). . Selected PICs' demography and energy data. The access to electricity in Fijian households is not 100 %.

What are the responsibilities of energy institutions in Fiji? The energy institutions in Fiji (Table 8), are responsible for energy planning, energy policy making, energy project financing, determination of energy prices (electricity tariff and fuel prices) and energy research. These institutions need to be well financed and adequately staffed to carry out its responsibilities effectively.
