

FINLAND E ABLE POWER

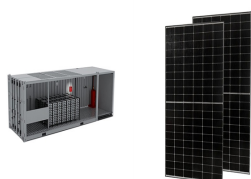

A Hybrid inverter is an intelligent inverter that enables the storage of excess solar energy in a battery system for self-use. Hybrid inverters function like a common grid-tie solar inverter but can generally operate in one of several different modes depending on the application, this includes battery backup mode which provides a limited level of backup power in the event of a blackout.

By being active in the market and simultaneously being able to tap into our extensive portfolio in Finland and across borders, we enable customers to achieve their sustainability and procurement targets with competitive pricing. Statkraft signs 10-year wind power agreement with Neste in Finland (Oslo, Norway/Espoo Finland, 1 September 2021

Nordic Electro Power We, the founders of NEPower, are already second or third-generation electricians. We wanted to create a company where things get done correctly and quickly, with professionalism and following best installation practices. We value people and life ??? that's why safety comes first in each step of our projects and daily operations. We

Dual Low-power Consumption. With the help of 4-pins plug technology, the transportation power consumption is less than 0.05mA. Also, the circuit protection technology ensures the sleep power consumption in long-term storage, which is at the uA level. This enables worry-free storage for up to two years. ITC Technology (Intelligent Temperature
