

How much does a solar panel cost in Georgia? We at the Guides Home Team conducted a solar panel cost survey across all US states. In Georgia, the average cost of a solar power system is \$2.60 per watt. You can expect to pay \$15,600 for a 6-kW home solar system. The 30% federal tax credit is \$4,680 in this case. The net cost of your solar installation is reduced to \$10,920.

Does Georgia have a solar rebate program? Georgia gets plenty of sunshine, just slightly less than the neighboring state of Florida. This means that solar panels can generate more electricity than in many other U.S. regions. Unfortunately, Georgia does not offer solar rebate programs and tax incentives as of 2023.

Does Georgia Power offer solar? From home installation and our buy back program,to non-installation options,our goal is to make solar an option for every Georgia Power customer.
