

# GIBRALTAR AOC ENERGY

---

How many power stations are there in Gibraltar? There are currently three installations in Gibraltar producing energy. Two of these installations namely Waterport and OESCO power stations supply electricity to the civil population,

What does the Gibraltar Electricity Authority do? The Gibraltar Electricity Authority is responsible for the generation, distribution and supply of electricity to the civilian population of Gibraltar.

Why does Gibraltar need a new power plant? This secures Gibraltar's energy supply economically, environmentally and sustainably. The associated closure of the three old plants represents the largest measure taken to improve air quality and reduce greenhouse gas emissions. The new power plant consists of six engines; 3 of which run on natural gas and 3 of which are dual fuel.

Does Gibraltar have electricity? Until recently, Gibraltar's electricity supply was dependent on some 40 diesel-powered engines and turbines distributed across Gibraltar. In 2019 a new, modern power station situated at the North Mole commenced operation running long term on liquid natural gas (LNG).

Why does Gibraltar need a LNG power system? The people and businesses of Gibraltar will have better air quality, a quieter environment, and see the rewards of better energy efficiency. Michael Caetano, Chief Operational Officer of the Gibraltar Electricity Authority (GEA) When Gibraltar upgraded its nearly 40-year-old power system, they opted for a unique LNG solution.

# GIBRALTAR AOC ENERGY

Does Gibraltar need a cleaner liquefied natural gas (LNG)? Until recently, Gibraltar's energy needs were 100% powered by marine diesel so, a better solution was urgently needed one that switches from diesel to cleaner liquefied natural gas (LNG).

The AOC focuses on energy conservation, which saves utility funding, allowing savings to be reinvested into our buildings and infrastructure. The AOC has used energy performance contracting and energy savings over the past twelve years to fund more than \$200 million in building and infrastructure energy improvements. These investments have

According to the agreement between Eco Wave Power and the Government of Gibraltar, the pilot was built and originally supposed to operate only for two years, with the purpose of proving that wave energy can safely connect to the grid and withstand the Gibraltar storms, using its storm-protection mechanism.

The scheme applies to large undertakings and groups containing large undertakings in Gibraltar. These assessments are audits of the energy used by their buildings, industrial processes and transport to identify cost effective energy saving measures. The administrative body for this scheme is the Department of the Environment and Climate Change.

The Architect of the Capitol's (AOC) commitment to energy conservation and sustainability has resulted in a reduction of energy use by almost 50 percent across the Capitol campus since 2003. Skip to main content. The 2024 U.S. Capitol Christmas Tree will arrive Friday, 11/22.
