

GREENER POWER SOLUTIONS B V TONGA

What is greener power solutions (greener)? AMSTERDAM, April 4th, 2023
??? Greener Power Solutions (Greener), European leader in clean and smart solutions for the temporary energy market, is expanding to the United Kingdom.

Who is greener? Greener was founded in January 2018 to make an impact on the CO2 footprint of on- and off-grid energy markets, using mobile batteries and smart energy planning. Read more about: Power your next project in the most sustainable way. Receive our product updates, projects, news and job offers four times a year. We deliver clean mobile battery power.

How does greener provide the power supply? Last year, Greener provided the power supply through battery swapping: shuttling a battery back and forth to the festival site to discharge into an on-site battery, thus creating an energy supply even without a grid connection. This year, we expanded on that and brought some brand new innovations.

What is greener & how does it work? Greener was founded in Amsterdam in 2018 and offers sustainable mobile energy solutions by renting out mobile batteries and high-quality control software. Founders Dieter Castelein (CEO) and Klaas Akkerman (COO) believe that temporary energy supplies can play an important role in the crucial transition from fossil fuels to sustainable energy.

What happened to greener's battery? Fortunately, Greener's battery took over. Wonderful to experience that the light always stays on with us. Even in the event of a power failure. Greener was founded in January 2018 to make an impact on the CO2 footprint of on- and off-grid energy markets, using mobile batteries and smart energy planning. Read more about:
