

GREENLAND EPS SYSTEMS

To guarantee the highest quality and safety of its products, ThermoKey has had its EPS system (Adiabatic Evaporative Panel System) certified by an independent institution. The hygienic certificate refers to VDI 2047-2 which takes into consideration the requirements set by the law and by industry standards in the main countries of use of the

Greenland Systems collectors however were chosen due to the extensive durability testing which is in excess of Australian Standards. The field has been designed to provide 70 degree celcius water to a central 5,000L and, which supplies tempered water to ???

Local height systems in Greenland ??? Introduced 50+ years ago referenced to local mean sea level ??? 77 different height systems ??? +/- 0.25 m from current height system GVR2016 ??? Not named or ???

As a leader in energy storage systems for electric aviation, EPS is powering a revolution for smart, efficient, eco-friendly solutions. At EPS, we've flown it all: fixed wing, eVTOL, cargo drones, unmanned underwater submarines, and seaplanes. We are endorsed by some of the largest, most respected aviation companies in the world.

The end result is a foam core with the same great advantages of standard EPS, however, with a thermal resistance (R-value) nearly 20% greater than standard white EPS. With Innova Eco Building System, we put technology in your hands as Architect's, Contractors and end users can specify the SIP panel skin that best meets the needs of your project.
