We use photovoltaic solar panels to create the electricity that our machines use. Currently we have 6920 watts of pv power on our roof and in our yard, large deep cycle batteries and various controls as our power system. We use grid power to augment and back-up the solar panels by employing a large fork-lift battery charger.

Solar panels: Convert sunlight into electricity; Charge controller: Regulates the flow of electricity from the solar panels to the batteries; Batteries: Store electricity for use at night or when the sun is not shining; Inverter: Converts DC ???
