What are hybrid solar panels? A hybrid solar panel is a combination panel that can produce electricity and heat at the same time. They're also known as solar PV-T, or solar photovoltaic-thermal panels, meaning they take both energy and heat from the sun.. What that means for us, is that we can use one panel to generate electricity as well as heat and hot water.

The Haier M5 Heat Pump Water Heater range, running with R134a and unlike a traditional water heater, provides hot water using the heat in the air, reducing energy consumption and offering an A+ energy range. PV. In combination with Photovoltaic panels you can set the unit to optimise the use of electricity (M3C). Additional Information.
