Hammond Electronics has announced a significant market advance with the introduction of RFI-capable versions of its 1594 heavy-duty small enclosure family. In a major breakthrough in plastic enclosures, the 1594 cases are moulded in a metal-loaded plastic that gives attenuation levels of more than 50dB from 100 - 1000MHz. The light weight, low cost ???

Thanks to their durability, the enclosures of the Hammond PJU series are ideal solutions for solar and wind power stations, such as distribution cabinets or junction boxes for water treatment, pumping equipment, and other industrial purposes in demanding environments or in the exterior.
