cable hanger installations is a well-founded approach for both the 2017 and 2020 editions of the NEC. For installations required to meet the 2017 NEC, this means that cable hangers should be placed at 24" intervals and the cables secured to the hangers using cable ties at every other hanger (4 feet between securements). The 2020 NEC requires

However, considering that only about 85% of a solar panel's energy capacity is fulfilled, you'd need five 160W panels to meet this 608kWh energy requirement, which would set you back around GBP1,120. This means it would take 26 months of using your motorhome to break even on your flexible solar panel purchase.
