

# HAWAII WIND FARM ENERGY STORAGE SYSTEM

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget-Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

What happened to Hawaii's last coal plant? Hawaii bid adieu to its last coal plant on September 1, 2022. This strategic shutdown eliminated 180 megawatts of fossil-fueled baseload power from Oahu's grid. The Kapolei Energy Storage plant, equipped with 158 Tesla Megapack 2 XL lithium iron phosphate batteries, now stands as the world's most advanced grid-scale battery energy storage system.

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget-Friendly Solution

- Modular Design for Flexible Expansion

What is Kapolei energy storage? The Kapolei Energy Storage plant, equipped with 158 Tesla Megapack 2 XL lithium iron phosphate batteries, now stands as the world's most advanced grid-scale battery energy storage system. Brandon Keefe, Executive Chairman of Plus Power, hailed this achievement as a landmark milestone in the transition to clean energy.

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget-Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

How many battery energy storage plants will Plus Power operate in 2024? By June 2024, Plus Power aims to operate seven large-scale battery energy storage plants, totaling 1325 MW / 3500 MWh, across Arizona and Texas. Mark B. Glick, Hawaii's Chief Energy Officer, highlighted the project's alignment with the state's commitment to a cleaner, more reliable, and affordable energy system.

Air Cooling / Liquid Cooling

- Budget-Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

What does the Kes battery project mean for Oahu? Brandon Keefe, Executive Chairman of Plus Power, hailed this achievement as a landmark milestone in the transition to clean energy. The KES battery project, spread across 8 acres near Honolulu, brings a total power capacity of 185 megawatts and 565 megawatt-hours of electricity, serving as an electrical shock absorber for Oahu's power grid.

## Commercial and Industrial ESS

Air Cooling / Liquid Cooling

- Budget-Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

Are Kes batteries a good investment for Hawaiian Electric? The KES batteries play a crucial role in reducing the curtailment of renewable energy by 69%, allowing Hawaiian Electric to integrate 10% more new utility-scale renewables than previously projected. Additionally, the project is estimated to save customers money, reducing electric bills by an

Air Cooling / Liquid Cooling

- Budget-Friendly Solution
- Renewable Energy Integration
- Modular Design for Flexible Expansion

What does Hawaii's Energy Development Program do? Directed by statute to coordinate and undertake the development of Hawaii's abundant natural energy resources in order to diminish Hawaii's dependence on fossil fuels Building international collaboration to facilitate transfer of Hawaii's lessons learned to other Asia-Pacific regions. Currently active in Japan, Thailand, Vietnam, and Korea

BESS is connected to the Hawaii Island electrical grid at the point of common coupling with a 10.6 MW wind farm that is owned and operated by the Hawi Renewable Development (HRD) in the

Plus Power announced it has begun operating its Kapolei Energy Storage facility on Oahu, Hawaii, the most advanced grid-scale battery energy storage system in the world, helping transition the state's electric power from

The substation and interconnection points for the site have been energised and the photovoltaic (PV) farm is due to be commissioned in the first quarter of 2025. It will be coupled with a battery energy storage system of 120

Battery energy storage systems (BESSs) are being deployed on electrical grids in significant numbers to provide fast-response services. These systems are normally procured by the end user, such as

# HAWAII WIND FARM ENERGY STORAGE SYSTEM

THE WOODLANDS, Texas, Jan. 11, 2024 -- Plus Power??? announced it has begun operating its Kapolei Energy Storage facility on Oahu, Hawaii, the most advanced grid-scale battery energy ???

Hawaiian Electric pioneered wind energy development in Hawaii in the early 1980s. Today, Hawaiian Electric continues to add more wind power to island grids through wind farms at Kahuku and Kawaihoa on Oahu, Kaheawa and Auwahi ???

wind + storage site analysis; energy storage market analysis; energy storage utility feasibility study; energy storage due diligence; energy storage independent engineering report; energy ???

Five new solar-generation projects with battery energy storage systems ranging in size from 35 MWh to 240 MWh are expected to come online in Oahu in 2024, according to Hawaiian Electric's Renewable Project Status ???

Operational since 2012, the 21-megawatt project is located on the island of Maui and includes eight wind turbines, a battery energy storage system, and a nine-mile generator tie-line. Benefits A 12-year client partnership that has resulted ???

# HAWAII WIND FARM ENERGY STORAGE SYSTEM

Plus Power "develops, owns, and operates standalone battery energy storage systems that provide capacity, energy, and ancillary services, enabling the rapid integration of renewable generation resources," according ???

"By combining solar energy with advanced storage technology, we are helping Hawaii transition to a resilient and carbon-free electric system." According to Hawaiian Electric, in 2024 nearly 59% of the island's electricity ???
